

The Through-Line: Map Content & CTAs

Ahmed Elgharably — FlyRank ML Internship — General AI Fluency, Week 3

One-Line Claim

I turn noisy search data into ranked, evidence-backed decisions — so teams with limited time know exactly which pages to fix first.

How I got here: I asked Claude for ten options. They ranged from generic (“I build ML models for content optimization”) to overpromising (“I predict which pages will rank #1 on Google”). I picked the one that mentioned “noisy data” (honest about the problem), “ranked” (the output format), “evidence-backed” (my voice card value), and “limited time” (the real constraint). Then I sharpened it from “I help teams prioritize content” to the active, specific version above.

Content Map

Page 1: Home / Landing

One-line claim at the top: *I turn noisy search data into ranked, evidence-backed decisions — so teams with limited time know exactly which pages to fix first.*

Order	Section	Content	Case Used	CTA
1	Hero	One-line claim + name + role	—	Scroll to see proof
2	What I do	3-sentence summary of my lane (Refresh Scoring)	FlyRank capstone overview	“See the work” → Projects page
3	Proof preview	3 numbers from the starter data (visible+stale, declining+demand, low-CTR)	ML-02 research question	“Read the case study” → Case Study page
4	Bio snapshot	2 lines + headshot	Identity kit	“More about me” → About page
5	Contact CTA	Email + LinkedIn	—	“Get in touch” → elgharably44@gmail

Page CTA: “See the work” → Projects page

Page 2: Projects

Purpose: Show the work, not just talk about it.

Order	Section	Content	Case Used	CTA
1	Page title	“Projects —ranked by evidence, not hype”	—	—
2	Lead project	FlyRank ML Capstone: Refresh Scoring	Full case study (3 beats)	“Read the full case” → Case Study page
3	Supporting work	Prompt Ladder (FL-02)	Prompt iteration log	“See how I think” → FL-02 document
4	Supporting work	Frame It as Cases (FL-01)	Case study framing	“Read the framing” → FL-01 document
5	Supporting work	Identity Kit + Image Curation	Visual system	“See the kit” → Identity kit PDF
6	In progress	ML-03 onward (placeholder)	—	“Follow the repo” → GitHub

Page CTA: “Read the full case” → Case Study page (lead with strongest)

Page 3: Case Study — FlyRank Capstone

Purpose: The deepest proof. One case, fully unpacked.

Order	Section	Content	Proof Needed	CTA
1	Hero	Project title + one-line outcome	—	—
2	The problem	Content team, 30K pages, 20-50/week capacity	—	—
3	What I did	Lane choice, data contract, leakage audit, baseline, model	EDA screenshot, code snippet	—
4	The numbers	3 real numbers from starter data + model comparison table	Results screenshot	—

Table 3 – continued

Order	Section	Content	Proof Needed	CTA
5	What came of it	Precision@50: 0.24 → 0.74, ranked queue with reason codes	Top-50 queue screenshot	—
6	Careful words	What I can and can't claim	—	—
7	Repo link	GitHub repo + notebook	Live repo link	“View the repo” → GitHub
8	Next steps	Where the capstone goes in Weeks 3-7	—	“See all projects” → Projects page

Page CTA: “View the repo” → GitHub (the one action: verify my work)

Page 4: About

Purpose: The person behind the work.

Order	Section	Content	Proof Needed	CTA
1	Headshot	Real photo	Identity kit photo	—
2	Short bio	2-3 sentences, voice card tone	Bio from Frame It as Cases	—
3	What I believe	Evidence-first, no buzzwords, show the work	Voice card	—
4	Tools & stack	Python, scikit-learn, DuckDB, Hugging Face, Git	—	—
5	Currently learning	ML track Weeks 3-7, time-series labels, warehouse data	—	“Follow the repo” → GitHub

Page CTA: “Get in touch” → elgharably44@gmail.com

Page 5: Contact

Purpose: One action, zero friction.

Order	Section	Content	CTA
1	One-line claim	Repeated at top	—
2	Email	elgharably44@gmail.com	Click to copy / mailto
3	LinkedIn	Profile link	Open LinkedIn
4	GitHub	github.com/ AhmedElgharably	Open GitHub
5	Availability	Open to ML/data roles + freelance projects	—

Page CTA: “Send an email” → elgharably44@gmail.com (the ONE action from Week 1)

How CTAs Ladder Up

Every page’s CTA pushes the visitor one step closer to the **one action: get in touch**.

```
Home → "See the work" → Projects
Projects → "Read the full case" → Case Study
Case Study → "View the repo" → GitHub (builds trust)
About → "Get in touch" → Contact
Contact → "Send an email" → HIRED
```

No page strands the visitor. Every page has exactly one primary CTA, and every CTA leads forward or back to the path.

Still Need to Gather

Item	Status	Where it comes from	Blocker	When
Headshot (real photo)	⌚ Need to take	Phone camera	Need good natural light	This week
EDA screenshot from notebook	✅ Have it	w01_research_question.ipynb	None	Already captured
Model results table screenshot	✅ Have it	outputs/model_results.json	None	Already captured
Top-50 ranked queue screenshot	⌚ Need to generate	Run final pipeline on test set	Need to execute full notebook	Week 4
GitHub repo structure screenshot	✅ Have it	github.com/AhmedElgharably/ flyrank-ml-internship	None	Already captured

Table 6 – continued

Item	Status	Where it comes from	Blocker	When
Hero texture (AI-generated)	⌚ Need to generate	DALL-E with identity kit prompt	Need to write refined prompt	This week
Icon set (3 icons, AI → SVG)	⌚ Need to generate	DALL-E + Figma/Illustrator	Need to trace to SVG	This week
Live demo / paper	⌚ Not started	Capstone deliverable (Week 7)	Need to finish ML track	Week 7
ML-03 through ML-07 notebooks	⌚ Not started	FlyRank ML track assignments	Need to complete sequentially	Weeks 3-7
Warehouse dataset access	✅ Have it	Hugging Face FlyRank/ internship-warehouse	None	Already granted
Testimonial / mentor feedback	⌚ Not requested	FlyRank mentors	Need to complete more work first	Week 6-7

Honest Notes

- **The strongest work leads:** The FlyRank capstone is the only project with real numbers, real code, and a real dataset. Everything else (prompt ladder, identity kit) supports the story but doesn't stand alone. The case study page gets the most real estate.
- **The “still need” list is long because I’m early:** Week 2 of a 7-week capstone. The map is honest about what's missing so I don't build a portfolio full of placeholders and call it done.
- **One action, not three:** The contact page has email, LinkedIn, and GitHub — but the PRIMARY CTA is email. The others are supporting options. A visitor should never wonder “what do I do now?”

Submitted to the General AI Fluency track thread.
